**Databases & APIs:** MySQL, MongoDB, RESTful API design, supabase, Firebase

**Data Analytics & BI:** Power BI, Power Automate, Excel, data visualization, data entry & management

**Tools & Platforms:** Git, GitHub, GitLab, VS Code, Figma, Webflow, Vercel, Render

**Other:** Quality Assurance & Testing, UI/UX Design, CMS Management, Agile Methodology

## PROFESSIONAL EXPERIENCE

**Web Developer — Swing (Creative Agency) — swing.sa** [2024]

- Built the company website end-to-end using Webflow, from visual design through interactive user experience.
- Organized content and page structure to create a logical, user-friendly navigation flow.

**Web Developer & QA Analyst — Qomra Online Store — qomra.pro** [2021]

- Entered and managed catalog data for an e-commerce store of over 1,000 products.
- Reviewed and tested products and store functionality to ensure data accuracy and quality.
- Organized and designed the store interface to improve the overall shopping experience.

**Web Developer — AlAswdadi Art — alaswadiart.com** [2024]

- Designed and developed the brand's platform from scratch using Webflow, reflecting its identity professionally.

**Web Developer — Dar Al-Islam Services** [2022]

- Built a dedicated services page consolidating 500+ services, organized and accessible in multiple languages.
- Developed a custom CMS control panel and back-end functionality for ongoing content management.
- Designed and implemented a volunteer registration portal, including database structure and web forms for sign-ups.

**Web Developer — HeadLine (Creative Agency) — headline-sa.com** [2026]

- Designed and developed a responsive landing page with a clean, modern interface optimized for all devices.

**Quality Assurance Analyst — FatwaPedia — fatawapedia.com** [2023]

- Conducted a comprehensive review of the website to identify programming and functional errors.
- Tested the user experience and provided actionable feedback for improvement.
- Prepared detailed documentation of the control panel to support the internal team.

**Quality Assurance Analyst — Sunnah Center — alsunna.net** [2024]

- Performed comprehensive code review and full feature testing to improve site stability.
- Authored a simplified control panel guide to support the content management team.

**Web Developer — Alarjwan Restaurant** [2023]

- Developed a restaurant website featuring menu display and online ordering functionality.

**Web Developer — ServizULogistics** [2023]

- Built logistics management web solutions with effective shipment tracking systems.

**Web Developer — Athkar (Islamic App) — [athkar.atwebpages.com](http://athkar.atwebpages.com)**

[2023]

- Developed an Islamic application for daily athkar and duas with an easy-to-use interface.

## SELECTED PROJECTS

---

**Idea Vault — Personal Project — Full-Stack, AI Integration**

- Built a personal platform to store ideas, notes, links, and files in one place, with automatic AI-powered analysis and summarization for easier search and retrieval.

**Sunnah Search Platform — Personal Project — Next.js, RAG, Search Engine**

- Developed a research platform enabling users to paste hadith text and instantly retrieve the closest matching explanations from a library of uploaded books, with AI-generated summaries of commentary from multiple scholars.

**Power BI Dashboards (4) — Personal Projects — Power BI, Data Visualization**

- Built dashboards covering website analytics (new users, traffic sources, engagement), sales performance (monthly trends and profit margins by department), and the global data-jobs market (job counts, average salaries, and required skills).
