

ABDULAZIZ ALASWDI

Full-Stack Software Engineer | AI & Data Solutions

aswadies.87@gmail.com | 0532290642 | Riyadh

[Portfolio](#) | [LinkedIn](#)

SUMMARY

Software Engineer (B.Sc. Computer Science – Software Engineering, Honours, 2026; GPA 3.50/4.00) building full-stack web platforms since 2020, with freelance client work since 2021 across e-commerce, agency, and content platforms. Built DocuFlow AI, a secured multi-tenant AI document-processing platform, and an Arabic RAG research search engine. Microsoft-certified in Power BI and Power Automate; Google AI Professional Certificate. Seeking Full-Stack / AI-focused Software Engineer roles in Riyadh.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, PHP, C, HTML5, CSS3; Next.js, Node.js, Express, Laravel, Tailwind CSS, Bootstrap, jQuery

AI / LLM: Gemini & OpenAI APIs, RAG, OCR (Tesseract), Hugging Face, prompt engineering

Databases & APIs: MongoDB, MySQL, Supabase, Firebase, RESTful API design, JWT / RBAC, Webhooks

Data & BI: Power BI, Power Automate, Excel, data visualization

Tools & Practices: Git, GitHub, GitLab, Figma, Webflow, Vercel, Render, VS Code, Cursor; Agile, QA & testing, CMS management, technical documentation

SELECTED PROJECTS

DocuFlow AI — Document Automation Platform

Next.js 14, TypeScript, Node.js/Express, MongoDB, Gemini API

- Built a multi-tenant platform that extracts structured JSON from PDFs and images (OCR + Gemini), applies configurable business rules, and delivers results via webhooks.
- Secured the REST API with JWT, SHA-256-hashed API keys, role-based access control (3 roles), and 3-tier rate limiting; organized the backend as Routes → Controllers → Services.
- Implemented a rules engine and human-review workflow (completed / needs_review / failed) with an admin dashboard for documents, rules, API keys, and users.

Sunnah Search Platform

Next.js, RAG, Search Engine

- Research platform where users paste hadith text and retrieve the closest matching commentary from uploaded books, with AI summaries of multiple scholars' views.

Idea Vault

Full-Stack, AI Integration

- Personal knowledge platform for notes, links, and files with automatic AI analysis and summarization for faster retrieval.

Power BI Dashboards (4)

- Dashboards for website analytics, sales performance, and the global data-jobs market.

PROFESSIONAL EXPERIENCE

Freelance Web Developer & QA Analyst

- Dar Al-Islam Services:** Built a multilingual services page consolidating 500+ services, a custom CMS control panel and back end, and a volunteer registration portal with database design and sign-up forms.
- Amad Initiative (Alinma × Falak):** Designed and developed the bilingual (Arabic/English, RTL) landing page for a fintech innovation initiative in Next.js, with program sections, journey timeline, FAQs, and a registration-interest form.
- Swing, HeadLine & AlAswdadi Art:** Designed and developed the Swing website and the AlAswdadi Art brand platform in Webflow, plus a responsive landing page for HeadLine.
- Qomra Online Store:** Managed catalog data for 1,000+ products, tested store functionality for accuracy, and redesigned the storefront interface to improve the shopping experience.
- FatwaPedia & Sunnah Center (QA):** Performed full code review and feature testing, provided UX feedback, and authored control-panel guides for the content teams.

EDUCATION

Bachelor of Computer Science (Software Engineering), with Honours

Universiti Malaysia Pahang Al-Sultan Abdullah — Malaysia | GPA: 3.50 / 4.00

2026

CERTIFICATIONS

- Google AI Professional Certificate — Google Career Certificates, 2026
- Microsoft Power BI Data Analyst; Power Automate: Building and Managing Automated Workflows — Microsoft, 2025
